

Complete

Detergent/Disinfectant

COMPLETE has been designed to provide effective cleaning, deodorizing, and disinfection specifically for hospitals, food processing plants, food service establishments and other institutions where cleaning is of prime importance in controlling the hazard of cross contamination.

BENEFITS: When used as directed, **COMPLETE** is formulated to disinfect inanimate, hard surfaces. **COMPLETE** is designed to provide both heavy duty cleaning and disinfection.

COMPLETE deodorizes areas which are generally hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, toilet bowls and other areas which are prone to odors caused by microorganisms.

DIRECTIONS: DISINFECTION – To disinfect hard, inanimate surfaces, apply **COMPLETE** with a mop, cloth, sponge or mechanical sprayer so as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes and then let air dry.

GENERAL DISINFECTION: Add 4.5 ounces of **COMPLETE** per gallon of water.

HOSPITAL DISINFECTION: Add 6 ounces of **COMPLETE** per gallon of water. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. To disinfect toilet bowls, flush toilet and add 4.5 ounces of **COMPLETE** directly to the bowl water. Swab the bowl completely using a scrub brush or toilet mop, making sure to get under the rim. Let stand for 10 minutes, then flush.

NFPA Code: Health - 2, Fire-0, Reactivity -0

- Cleaner
- Detergent
- Deodorizer
- Mildewstat (On Hard Inanimate Surfaces)
- Disinfectant
- Fungicide (Against Pathogenic Fungi)
