## Fleet Wash<sup>®</sup> A

### Fleet Wash Brightener

---

**FLEET WASH<sup>®</sup> A** is a clear, low pH liquid, especially formulated to remove soils and oxide accumulations from aluminum, stainless steel, brass, painted surfaces, steel and copper. **FLEET WASH<sup>®</sup> A** is a very effective and economical product when used in DyChem's Fleet Wash Systems or Multi-Step Units.

**BENEFITS:** When applied and rinsed as directed, **FLEET WASH<sup>®</sup> A** is safe on the following surfaces: bronze, aluminum, stainless steel, copper, iron, steel, brass, rubber and lead. **FLEET WASH<sup>®</sup> A** quickly brightens aluminum and other oxidized surfaces. Use with **FLEET WASH S** to remove grease, oil, road film and other soils.

**DIRECTIONS:** Dilute **FLEET WASH<sup>®</sup> A** with water before use. The proper dilution depends upon the conditioning of the aluminum, or other metal, the dwell time available, the ambient temperature, and the equipment available. Typical dilutions are 1:10 to 1:50. Apply **FLEET WASH<sup>®</sup> A** through acid proof, low pressure or high pressure equipment. **FLEET WASH<sup>®</sup> A** can be applied in a Drive Thru Fleet Wash System. Do not allow solution to dry on the surface, and furnish a complete rinse by flooding.

**NFPA Code:** Health - 3, Fire - 0, Reactivity - 0, Special - Acid

- **Concentrated**
- **Highly Active**
- **Brightens**
