4. FIRST AID MEASURES

Inhalation First Aid

Inhalation is unlikely; however, if it does occur, remove victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, administer oxygen.

Skin Contact First Aid

Seek medical attention.

Remove contaminated clothing and shoes. Wash exposed areas with soap and water. For burns that are 25 square inches or larger or burns or irritations that seem worsen. Seek immediate medical attention.

Eye Contact First Aid

Contact with even diluted material should be treated immediately. Flush with plenty of water for at least 15 minutes holding eyelids apart to ensure flushing of entire eye surface. Seek medical attention immediately, especially if in contact with concentrate. No oils or oily ointments should be used unless ordered by a physician.

Ingestion First Aid

Contact a physician immediately. Do not induce vomiting! Give large quantities of water or milk. If vomiting occurs spontaneously, keep head below hip to prevent liquid entering the lungs. Do not give anything by mouth to an unconscious person.

Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labeling.

5. FIRE FIGHTING MEASURES

Extinguishing Media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Special Hazards from mixture

This product is not defined as flammable or combustible; however, under fire conditions it may support combustion and produce toxic oxides of carbon and various hydrocarbons.

Advice for firefighters

Wear self-contained breathing apparatus for firefighting if necessary/available.

Further information

No data available.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions

Avoid breathing vapors, mist or gas.

Protective equipment and emergency procedures

For personal protection see Section 8.

Environmental precautions

Avoid large concentrations of product in a confined area.

Materials for containment and clean up

Mop and/or absorbent materials

Revision 01/30/2015

Methods for cleanup containment

Completely contain spilled material. Dilute with water and absorb spill with inert media and scoop into disposal containers. Neutralize remaining traces of material with lime (calcium hydroxide). The spill area should then be flushed with water followed by liberal covering of sodium bicarbonate. All clean-up material should be removed and placed in approved containers for disposal. If spilled on soil, sand, etc., remove affected soils and place in containers for disposal. Persons performing clean-up work should wear adequate personal protective equipment and clothing. Large spills should be removed using a vacuum truck.

Reference to other sections

See Section 13 for disposal procedures
